

BUILDING

Greenlight Building is developed by E-VIS to help council's building department to manage building permits more efficiently. Applications are lodged, tracked and processed on-line. The system can be deployed in-house on Council's servers or can be subscribed as 'pay as you go' hosted service.

Major Features

- Lodge applications online
- Track progress of applications
- Upload documents
- Make payments online
- 24 hours a day, 7 days a week access to applications
- Configured to Council's business processes
- Automatic letters and permits generation

greenlightTM

Supported Application Types and Procedures

1. Applications for Building Permit
2. Building Permits issued e.g. OCCU and CFI
3. Private Building Surveyor lodgement and issued permits
4. Compliance enforcements such as swimming pools, essential safety measures and damaged building
5. Building Certificates - request for information by external parties
6. Applications for temporary structures approval
7. Applications for report & consent

Our flexible workflow engine can be configured to support more application types and procedures.

Reports

All reports can be scheduled to run on specific date and time or ad-hoc. Reports are sent to recipients via email.

- Building Register
- Notification Section 80
- Building Permits Issued
- Notification Occupancy Permit Issued
- Applications Lodged
- Footpath Inspection Report
- Monthly Levy Report electronically sent to the Building Commission
